# S16 Solar Energizer

Effective portable fencing solution

**Quick to install** - can be setup easily in any location and moved about as required allowing it to be used for grazing applications and better pasture management

**Turn on and forget** - Energizer will continue to work for up to 3 weeks without sun

Battery Indicator Light

**360° mounting on t-posts** for correct orientation toward the sun - allows the Energizer to be mounted on a t-post that is already part of the fence line, regardless of which way the post is facing

1.5 Watt Solar Panel

**Water resistant case & components with built-in lightning protection** - designed to be left outside, in all weather conditions giving the farmer confidence that it will keep stock contained

Blister pack.
